### DETAILED ACTION

1. This Office action is a response to the preliminary amendment filed June 23, 2003. Claims 36-45 are pending in the application. Applicant has canceled claims 1-35.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 36-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. As per claim 36: in the last line, the intended means for "transparent" in the term "transparent trap layer" is unclear. Furthermore, it is unclear whether the specification has support for the claimed "transparent trap layer".

- b. Claims 37-45 are rejected as including the deficiency in the independent claim 36.

#### ***Information Disclosure Statement***

4. Applicant mentioned in the remark portion of the paper filed June 23, 2003 that IDS was filed cited therein all the references cited in the parent applications. However, the examiner fails to locate IDS from the Image File. As a result, all of the references cited in the parent applications are hereby listed in the attached form PTO-892.

#### ***Conclusion***

5. Due to the unclear in the scope of the claimed invention, as a result of the unclear in the definition of the term "transparent trap layer" as mentioned above, the examiner has not yet determine the

patentability of the claims over the prior art of record and/or determine whether the claims should be rejected under obvious double patenting.
